

Fairground Equipment / Livestock Panels (page 1 of 2)

We have been supplying stalls, pens, panels and gates to county and state fairs all around the United States for decades. We supply what you need. Please contact us for more information or to ask for a bid from us. We will compare our quality and prices with anyone...and win!

We have two different styles of fairground equipment the Weldy-Style, and the Handi-Klasp Style. The Weldy-style is made with round tubes and has no loose parts. The Handi-klasp style is a little bit heavier and uses square tubes and has a self latching gate and is a bit more expensive.. One of our styles is sure to fit your needs.

The photograph to the left shows a Weldy-style ten-pen unit. Units are available in different numbers of pens and sizes of pens. A pen series can be placed in an arena and can be part of a partition. Gates swing in and out and lock shut. The patented latch eliminates parts and permits fast assembly.

Pricing for Weldy-Style Fairgrounds Equipment

Fairgrounds Standard Height (swine) \$ 14.25/ft.
Fairgrounds Standard Plus 6" (sheep & goats) \$ 15.00/ft.
Wall brackets are the same pricing per ft. depending on model
Arches & swinging gates are an extra \$130.00 whether standard or standard plus.
Gates include patented slide bar latching.

Weldy-Style Fair Pens (round tubes, no loose parts)

Weldy Livestock Panel Features:

- Designed for double rows or single rows.
- Wall brackets are available for single rows along a wall.
- Panels are latched together and because of weight are not easily moved.
- The patented latch has no loose parts.
- Panels assemble and disassemble quickly.
- Gate panels swing either way from either end.
- Vertical rods do not permit climbing.
- Panels and gates last almost indefinitely.
